FIS have the in-house capability to recover the following metals from aqueous solutions, catalysts and contaminated solids including:

- Copper
- Nickel
- Tin
- Cobalt

Industries We Serve:

- Chemical
- Petrochemical
- Oil industry (fatty catalysts)
- Hydrogenation
- Adhesives
- Food
We Recycle

Spent nickel catalysts (Ni), spent molybdenum catalysts (Mo), spent tungsten catalyst (W), spent copper catalysts (Cu), spent platinum catalysts (Pt) and spent cobalt catalysts (Co)
